Check Types

Overview of the different check types and their purpose.

The check type groups those checks that have a common purpose. On the [Check Tool](#) page, each tab represents a check type.

Overview of Check Types

Check Type	Description	Automatic Job Runs
System Health	<p>Checks that run without parameters and check configuration and data issues that need to be fixed.</p> <p>The predefined selection criteria displays only those that have returned errors or warnings after the last run. We recommend you solve these in a timely manner.</p> <p>To display all checks, select all result types in the Result Type search filter and select Go.</p>	<ul style="list-style-type: none"> Automatic initial run at the beginning of a new release Periodic runs (usually monthly)
Migration	<p>Checks that perform an automatic migration of features.</p> <p>When you open the page, only pending migrations are displayed. To display also the completed migrations, turn on the Show completed migrations also search filter and select Go.</p>	<ul style="list-style-type: none"> Automatic initial run at the beginning of a new release Periodic runs (usually monthly)
Validation	<p>Checks which need one or more parameters for execution, for example:</p> <ul style="list-style-type: none"> A specific template A specific user A specific time frame <p>Validation checks can be triggered by single selection and choosing the Run button. A popup appears with input fields for the parameters. Execution of multiple checks at once is not possible.</p>	Only triggered through user

Exporting a List of All Checks

Get an overview of all checks available in the system by exporting a CSV file.

Procedure

1. Go to [Admin Center](#) > [Check Tool](#).

The [Check Tool](#) page opens.

2. In the top-right corner, select [Export all checks](#).

A CSV file with all checks available in the system is downloaded, including check descriptions and application area.

i Note

The list includes also checks that you can't access from the user interface if you don't have the corresponding applications set up, or if you lack the required permissions.
